Local and General

The Chronicle invites readers to send in items of interest for publication under this heading. If you know of any visitors, or have other notes of interest send it in.

The new U.G.G. Elevator is very near completion, and judging by the weather we are having will be in time to take in its portion of this seasons crop.

The U.F.A. Hall was opened on Thursday last week. Mr. Sharp set the ball rolling with that famous picture "The Ten Commandments." A record crowd turned up to see it, and Mr. Sharp is to be commended for his enterprise in presenting such a great picture to his country patrons. Everyone went away with one expression "Wonderful."

Gus Rettschlag has purchased the premises lately used as a rest room, owned by the Atlas Lumber Co. He moved into his new premises on Wednesday of this week.

CHURCH OF THE ASCENSION.

Sunday, October 18th, 1925.
At 11-0 a.m. Morning Prayer and Holy Communion.
Rev. W. Marsh, Minister.

Wanted to buy a Good fresh Cow, must be fresh now or coming in soon. Phone 40, J. Belshaw, Crossfield.

The Womens' Guild intend having a Chicken Dinner on Monday, Nov. 9th. Time and place later.

UNITED CHURCH, CROSSFIELD

Sunday, Oct. 11th, 1925.
Sunday School, Crossfield 2 p.m.
Evening Service at 7-30

RED ROSE COFFEE "is good coffee"

Confidence--A National Keystone

Evidence accumulates of the tremendous impetus which the 1925 crop of Western Canada is giving to business throughout the length and breadth of the Dominion, while paving the way for still greater increases and expansion. Almost every day the daily newspapers tell of some new record established. Both the C.P.R. and Canadian National are loading larger numbers of cars daily with grain than ever before in their history, with the result that the stream of wheat pouring into the terminal elevators is surpassing anything hitherto experienced in this country.

The Saskatchewan Co-operative Elevator Co., the largest initial wheat handling company in the Dominion, if not in the world, recently took in 1,200,000 bushels in one day, where as in no previous year did it quite reach the one million bushel mark.

Another most gratifying feature of this year's crop is that the actual yield per acre is not only coming up to the earlier estimates, but, taken on the whole, those estimates are being exceeded. In the matter of grade, too, the output is highly gratifying, this year's crop grading higher than in any previous year. Not only is a very high percentage of contract grades, but at least half of the contract grades in Saskatchewan is reported as No. 1 North.

The large increase in wheat production in Canada this year, the satisfactory yield per acre, the good grade, and the substantial price is becoming well known throughout the United Kingdom, where the crop this year has fallen away below the average. As a result, a movement of United States farmers to Western Canada has already begun.

The 1925 crop has also provided a final and conclusive reason for such an old established concern as the Hudson's Bay Company to take active steps to carry into effect its pre-war policy of extending operations throughout the West. The H. B. Company has, therefore, commenced building operations on a new \$5,000,000 store in Winnipeg, is enlarging its store in Vancouver, has purchased additional property to provide extensions at Calgary, Edmonton and Saskatoon, and has just concluded the purchase of an extensive site for a store in Regina.

These are some of the outward and tangible evidences of the renewed confidence in Western Canada which is now felt by everybody. That restored confidence is, in fact, the most valuable asset of all. It means more to our people and to this country and its future than all the millions of dollars of new wealth which the crop itself represents.

While the West was passing through the past few trying and difficult years, there was an all too general tendency towards pessimism and in the direction of decrying the country itself. When times are rather hard, and all people are looking at the blue side of things, they are apt to forget that all countries have periods of depression, and that every year cannot be a "good" year. This year's crop, however, has demonstrated that Western Canada, as a country, is all right, and as a result the people are taking heart. There will be no boom, but there will unquestionably be a newer and firmer confidence.

And confidence is, let it be repeated, a real and vitally important national asset. Lack of confidence on the part of the people of Canada individually has, in the past, been an outstanding national weakness. In the planning and execution of great national undertakings Canadians have displayed confidence, but all too frequently in their individual capacity and enterprises they have been timid and fearful to venture. Such lack of confidence has been more in evidence in the East than in the West, although this section of the Dominion has not lacked croakers and prophets of blue ruin.

This year the West is not only proving to its own people what it can do, but it is demonstrating to all Canada and the world at large that under normal conditions it can provide the means to keep all the wheels of industry turning.

New Holstein Sales Service

Prospective Buyers Notified Where Cattle Are For Sale

The Holstein-Friesian Association of Canada, through their fieldman, Mr. R. M. Holby, Port Perry, Ont., are providing a special sales service for prospective buyers of Holstein cattle. It is intended to help the small breeder by letting prospective buyers know where cattle are for sale.

The fieldman will visit established herds and report on the cattle offered for sale, as far as humanly possible, in order to give buyers definite information on the quality and breeding of the cattle offered.

The men and women who are lifting the world upward and onward are those who encourage more than criticize.

Makes Good Impression

J. H. Woods, of Calgary, Receives Rousing Reception in New Zealand. A wonderful impression was made on the people of New Zealand by J. H. Woods, president of the Canadian Press and a delegate to the Imperial Press conference now being held in Australia.

"He is the best speaker of the delegation," states a New Zealander, in a private letter received from Auckland. "At the New Zealand Government banquet to the delegates, Mr. Woods' voice 'shook the building,' and men leaped from their seats to cheer," the writer adds.

Granite is called the Mother Rock because it is the lowest rock in the earth's crust. Granite shows no evidence of animal or plant life.

Children Cry for

MOTHER:—Fletcher's Castoria is a pleasant, harmless Substitute for Castor Oil, Paregoric, Teething Drops and Soothing Syrups, especially prepared for Infants in arms and Children all ages.

To avoid imitations, always look for the signature of *Dr. J. C. Fletcher*. Proven directions on each package. Physicians everywhere recommend it.

Supremacy Of the Air

New British Seaplane is Capable of Great Speed

The Napier S-4 which is the secret seaplane built at Southampton for the British entry in the Schneider air cup race at Baltimore, is now ready for shipment to the United States. The utmost secrecy is still preserved, but it is capable of speed of considerably more than four miles a minute. The machine has monoplane wings built in one piece and no fabric is used, the only materials being metal and wood. The propellers are metal and the design throughout is entirely novel. The British hope not only to win the cup, but to gain definite air superiority.

BEAUTIFY IT WITH

"DIAMOND DYES"

Just Dip to Tint or Boil to Dye

Each 15-cent package contains directions so simple any woman can tint soft, delicate shades or dye rich permanent colors in lingerie, silks, ribbons, skirts, dresses, coats, stockings, sweaters, draperies, coverings, hangings—everything!

Buy Diamond Dyes—no other kind—on your drug store, whenever the material you wish to color is wool or silk, or whether it is linen, cotton or mixed goods.

The first steamer of the Swiss navy was built 97 years ago by an American, Edward Church, who then was the United States consul in France.

When Asthma Comes do not despair. Turn at once to the help effective—Dr. J. D. Kollig's Asthma Remedy. This wonderful remedy will give you the aid you need so surely. Choking, coughs, breathing becomes natural and without effort. Others, thousands of them, have suffered as you suffer but have wisely turned to this famous remedy and ceased to suffer. Get a package this very day.

Most people believe that diamonds will not wear out, yet those used in fine glass engraving establishments wear out within six or eight weeks.

Painless and perfect in their action, Miller's Worm Powders are always a safe and reliable remedy for children who show symptoms of worms. These symptoms are easily recognizable in a certain restlessness, frequently ending in convulsions. A point of notable importance is that after Miller's Worm Powders have expelled the worms, the stomach and bowels are toned up into a very healthy condition.

A Tale Of Shipwreck

Bottle Message of Tragic Import Is Found After Many Months

On a little island in the centre of the Indian Ocean, far from the steamship lanes, may be lying the bones of five seamen, saved from drowning when the Mary A. Bolling, of Philadelphia, was wrecked in a storm on March 18, 1924, according to a dispatch from Brussels.

A nurse at a sanatorium at Breda, near Ostend, found in the sands a bottle containing the following message: "Sailing ship Mary A. Bolling, from Philadelphia, wrecked in storm March 18, known latitude 53 east, longitude 10 south. Five were saved but will starve unless somebody comes soon. Please notify grandfather, P. S. Woods, 4103 Walnut Street, Philadelphia. For God's sake hurry."

The bottle, with its message of hope, travelled many thousands of miles before it was picked up in Belgium.

Minard's Liniment for Colds

Thief Returns Valuable Watch
A year ago, burglars entered the home of E. P. De Bow, Chicago, president of the American Academy of Letters, through a window and stole jewelry, including a specially made \$800 wrist watch that enabled Mrs. De Bow, who is blind, to tell the time. There was said to be only one other watch like it in Chicago. The other night the same window was railed and a package pushed through. It contained the watch and this note: "Jenn Considers is doing, can you to to have this and pray for him. His pal."

WEEKLY NEWS BULLETIN

Many Homesteads Filed On

A total of 71 homesteads were filed on during the month of September in the Edmonton land district, which includes a large territory in central and northern Alberta. In addition to this 11 soldier grants were filed on.

Heavy Registration at Varsity

Alberta University is receiving a heavy registration for the coming term. The number of students in attendance is likely to exceed last year's total of 1350.

Good Building Record

One million dollars in building permits in the past nine months is the record at Calgary which is a considerable increase over last year's record.

Publicity Pictures

Motion pictures for distribution among the news reels in circulation were taken the past week to the extent of nearly 1,000 feet in the Edmonton district by representatives of film concerns. These included scenes on the farm of Lord Rodney at Fort Saskatchewan, and the Gillies farm at Clover Bar. Pictures were obtained of the titled students in farming from the old land who are working on the farm of Lord Rodney.

Alberta's Gas Production

For the first time in the province's history, Alberta has taken first rank among the provinces of Canada, in the production of natural gas. The dominion bureau of statistics report for the production for the first six months of this year states that Alberta's production during that period was 4,687,084 million cubic feet, with Ontario second with a production of 3,257,429 million cubic feet.

Irrigation Settlers

An average of a new settler a day is being placed on the Lethbridge Northern irrigation tract, states James Pike, manager for the tract under the provincial government supervision.

To Take Over Poultry Marketing Plant

Arrangements for the taking over of the provincial government poultry marketing plant by the provincial poultry pool are under way between the officials of the pool and Hon. Geo. Hoadley, Minister of Agriculture. This service has been in operation for some years, and has formed a substantial nucleus for the new pool.

Western Picture

The Western Pictures company, an all-Canadian concern, has been engaged during the past week filming scenes in the buffalo park at Wainwright in connection with the picture, "Policing the Plains." This film covers the story written by Rev. R. G. McBeth of Vancouver.

Exhibits for International

Two thousand farmers in the province are being notified by the Department of Agriculture of the forthcoming International Hay and Grain Show at Chicago, from November 28 to December 5, at which Alberta farmers have always been prominent exhibitors. Farmers who intend to exhibit this year are asked to have their entries into the Provincial department of Agriculture by November 3rd, as all entries must be in Chicago by November 9th. Exhibits are to be shipped to the seed cleaning plant of the Department at Edmonton, from where the department will pay freight or express to Chicago. The exhibits are to be in place in Chicago by November 23rd. The

Department also bears the expense of putting up the exhibits. The Department is offering again an honorarium of \$150 for each grand championship won by an Alberta farmer, and \$100 for each first prize.

Canadian Briefs

U.S. Landseekers' Party Have Successful Trip

"Canada to-day is the land of opportunity for all forward-looking people, and so far as we can see the Canadian people are meeting their problems wisely and squarely, and this, together with your fertile soil and splendid wheat-growing climate, makes Canada the 'best bet in farming' now and in years to come." This opinion was expressed the other day by a group of thirty American farmers on their return from a journey to Snipe Lake and Eaton districts of Saskatchewan for landseeking purposes. During their visit to Canada, the members of the party, who were brought to the west by the Agricultural and Colonization Department of the Canadian National Railways, purchased thirty-three farms in the Eaton, Snipe Lake and Turner districts of Saskatchewan. This represented a ninety per cent sale of farm homes to the group and means the movement of at least 100 persons from the states of Nebraska, Minnesota, Wisconsin and North Dakota during the coming year.

"It is the most successful trip of its kind that I have seen since pre-war days," declared A. M. Johnson, western manager of the Agricultural and Colonization Department, Capt. L. B. Boyd, superintendent of the department at St. Paul, who organized the party, said the results had exceeded his expectations and that this trip was but the fore-runner of several other parties which he hoped to bring to Western Canada.

An important feature of these transactions is that not one of the farms purchased is more than five miles from any town and several are adjoining townships. The land in question was all vacant and is situated in extremely well developed districts where transportation and other facilities are already provided for the new-comers.

A Winner.—Hub—I don't think you need any more clothes.

Wife—I don't if you want me to win the prize offered by our society for old fashioned costumes.

Miss Beck will be at the Hotel Oliver on Thursday of each week to attend to your Beauty Parlor requirements.

For Appointments—Phone 54.

Ten Thousand Alberta Farmers WITH ONE MILLION ACRES OF WHEAT

Are Now Ready to Join the Wheat Pool

A Commission of \$1.50 per Contract
will be paid on all bona fide Contracts
sent to Head Office

BETWEEN SEPTEMBER 28th and
DECEMBER 31st, 1925.

The Campaign is open to the public and a commission will be paid to all Canvassers except members of the Board of Directors and Employees of the Pool.

Delegates and Local Secretaries are eligible to canvass and to receive commission.

CONDITIONS OF CAMPAIGN

- (1) All contracts sent in must be complete as to signature of the grower, his Post Office address, land location, etc. If the growers name is not clearly written, print it.
- (2) A Canvasser's Report properly filled in must accompany each parcel of Contracts. This will show to whom the Commission should be paid.
- (3) Where the membership fee of \$3.00 is paid in cash by the signer, the canvasser may remit \$1.50 to the Head Office and retain the balance as his commission.
- (4) Where the grower signs the note for \$3.00, the canvasser should see that the signature is properly witnessed. A commission of \$1.50 per contract will be mailed to the canvasser's address as shown on the canvasser's report accompanying the Contract.
- (5) Contract forms, Canvasser's Report forms, and self addressed envelopes, are being sent to all Wheat Pool Delegates, Wheat Pool Local Secretaries, U.F.A. Secretaries, and Secretaries of Municipal Districts, or you can write to Head Office for supplies.

Increase Your Selling Strength
By an Additional Ten Million
Bushels in This Year's Pool.

Producers Limited, Calgary.

BARRE, SON OF KAZAN

James Oliver Curwood

A LOVE EPIC OF THE FAR NORTH

Copyright, 1917, by Doubleday, Page & Co.
"BARRE, SON OF KAZAN," a Vitaphone Picture, With Wolf, the War Dog, is an Adaptation of This Story

SYNOPSIS

Hidden beneath a huge rock, Barre, the untamed wolf-dog, was terrified to see Pierrot, the half-breed trapper, shoot and kill a black bear. This was dangerous, but for the two human creatures it was the business of life. Nepeese went after Barre and tried to entice him from his hiding place. For the first time the dog had a name. It was the Indian princess who called him Barre.

CHAPTER VIII.—Continued.

In that moment Nepeese felt the pressure of the rock on his shoulder, and into the eyes that had been glowing softly at Barre there shot a sudden wild look of horror. And then there came from her lips a cry that was not like any other sound that he had ever heard in the wilderness—wild, piercing, filled with agonized fear. Pierrot did not hear that first cry. But he heard the second and the third—and then scream after scream as the Willow's tender body was slowly crushed under the settling mass. He ran toward it with the speed of the wind. The cries were weaker—dying away. He saw Barre as he came out from under the rock and ran into the stream, and in the same instant he saw a part of the Willow's dress and her moccasined feet. The rest of her was hidden under the death trap. Like a madman Pierrot began digging. When a few moments later he drew Nepeese out from under the boulder she was white and deathly still. Her eyes were closed. His hand could not feel that she was living, and a great moan of anguish rose out of his soul. But he knew he was saving her a life. He tore open her dress and found that she was not crushed as he had feared. Then he ran for water. When he returned, the Willow's eyes were open and she was gasping for breath.

"The blessed saints be praised!" sobbed Pierrot, falling on his knees at her side. "Nepeese, ma Nepeese!"

CHAPTER IX.

Impelled by the wild alarm of the Willow's terrible cries and the sight of Pierrot dashed madly toward him from the dead body of Wakayoo, Barre did not stop running until it seemed as though his lungs could not draw another breath. When he stopped, he was well out of the canyon and headed for the beaver pond.

Exactly where lay Barre's fears it would be difficult to say—but surely it was not because of Nepeese. The Willow had chased him hard. She had flung herself upon him. He had felt the clutch of her hands and the smother of her soft hair, and yet he was not her afraid. If he stopped now and then in his flight and

looked back, it was to see if Nepeese was following. He would not have run hard from her—alone. Her eyes and voice and hands had set something stirring in him; he was filled with a greater yearning and a greater loneliness now—and that night he dreamed troubled dreams.

Barre was glad when the dawn came. He did not seek for food, but went down to the pond. There was little hope and anticipation in his manner now. He remembered that, as plainly as animal ways could talk, Umik and his playmates had told him they wanted nothing to do with him. And yet the fact that they were there took away from his loneliness. It was more than loneliness. The wolf in him was submerged. The dog was master.

"The blessed saints be praised!" sobbed Pierrot, falling on his knees at her side.

In one of the larger canals Barre surprised a big beaver towing a four-foot cutting of birch as thick through as a man's leg—half a dozen breakfasts and dinners and supper in that one cargo. The four or five inner barks of the birch are what might be called the bread and butter and potatoes of the beaver menu, while the more highly prized barks of the willow and young alder take the place of meat and pie.

Barre sniffed curiously at the birch cutting after the old beaver had abandoned it to float, and then went on. He did not try to hide himself now, and at least half a dozen beavers had a good look at him before he came to the point where the pond narrowed to the width of the stream, almost half a mile from the dam. Then he wandered back. All that morning he hovered about the pond, showed himself openly.

In their big mud-and-stick strongholds the beavers had a court-of-war. They were distinctly playful.

It may be that the beavers discussed the matter fully among themselves. It is possible that Umik and his playmates told their parents of their adventures, again emphasizing the fact that the stranger, while frightening them, had shown no disposition to attack them. All this is quite possible, for if beavers can make a large part of a continent's history, and can perform engineering feats that nothing less than dynamite can destroy, it is only reasonable to suppose that they have some way of making one another understand.

However this may be, courageous old Beaver-tooth took it upon himself to end the suspense.

It was early in the afternoon that for the third or fourth time Barre walked out on the dam. This dam was fully two hundred feet in length, but at no point did the water run over it, the overflow finding its way through narrow sluices. A week or two ago Barre could have cruised to the opposite side of the pond on this dam, but now—at the far end—Beaver-tooth and his engineers were adding a new section of dam, and in order to accomplish their work more easily, they had

INECTO RAPID

TORONTO, ONTARIO

flooded fully fifty yards of the low ground on which they were working. The main dam held a fascination for Barre. It was strong with the smell of beaver. The top of it was high and dry, and there were dozens of snugly little hollows in which the beavers had taken their sun-baths. In one of these hollows Barre stretched himself out, with his eyes on the pond. Not a ripple stirred its velvety smoothness. Not a sound broke the drowsy stillness of the afternoon. The beavers might have been dead or asleep, for all the stir they made. And yet they knew that Barre was on the dam. Where he lay, the sun fell in a warm flood, and it was so comfortable that after a time he had difficulty in keeping his eyes open to watch the pond. Then he fell asleep.

Just how Beaver-tooth sensed this fact is a mystery. Five minutes later he came up quietly, without a splash or a sound, within fifty yards of Barre. For a few moments he scarcely moved in the water. Then he swam very slowly parallel with the dam across the pond. At the other side he drew himself ashore, and for another minute sat as motionless as a stone, with his eyes on that part of the dam where Barre was lying.

A few yards away Barre was almost hidden in his hollow, only the top of his shiny black body appearing to Beaver-tooth's scrutiny. To get a better look, the old beaver spread his fat tail out beyond him and rose to a sitting posture on his hind-quarters, his two front paws held squirrel-like over his breast. In this pose he was fully three feet tall. He probably weighed forty pounds, and in some ways he resembled one of those good-natured, silly-looking dogs that go largely to stomach. But his brain was working with amazing celerity. Suddenly he gave the hard mud of the dam a single flap with his tail—and Barre sat up. Instantly he saw Beaver-tooth, and stared. Beaver-tooth stared. For a full half-minute neither moved the thousandth part of an inch. Then Barre stood up and wagged his tail.

That was enough. Dropping to his fore-feet, Beaver-tooth waddled—lurefully to the edge of the dam and dived over. He was neither cautious nor in very great haste now. He made a great commotion in the water and swam boldly back and forth under Barre. When he had done this several times, he cut straight up to the top of the largest of the three houses and disappeared. Five minutes after Beaver-tooth's exploit, word was passing quickly among the colony. The stranger—Barre—was not a lynx. He was not a fox. He was not a wolf. Moreover, he was very young—and harmless.

Passengers From London to Paris
Have Not Met Me
The latest addition to the air service between London and Paris is a new giant plane capable of carrying 30 passengers and equipped with a restaurant. A steward will be in attendance at all times during voyages to serve hot meals to the passengers. Another machine now under construction in London for the Constantinople aerial route will be a winged copy of the modern railway sleeper having berths and dressing rooms.

Nurses Use English At World Meeting

Chosen As Official Language at Congress in Helsinki, Finland

Although nearly every country in the world was represented at the fifth congress of the International Council of Nurses, held in Helsinki, Finland, in July, English was chosen as the official language. Miss Beatrice Ellis, superintendent of nurses at the Toronto Western Hospital, and the assistant superintendent, Miss Ida McAfee, who attended the congress, referred to the remarkable fluency of the majority of the delegates in English as well as other languages. China's representative was able to present her reports and suggestions in excellent English, but the charming Japanese official delegate had to use an interpreter.

Finland nurses during the year preceding the congress gave up many of their leisure hours to the study of English in order that they might be properly equipped for an international convention. Miss Ellis praised highly the committee responsible for all the arrangements of the congress, and declared that she was much impressed with the wonderful organization of the Finnish nurses.

Canada's delegate occupied an important place on the programme, and the exhibits of books, slides and equipment from the Dominion, in the opinion of Miss Ellis, were second to none. In matters of nurses' training schools, hospital administration and public health work also, Canada was well to the fore. Miss Jean Brown, president of the Canadian Nurses' Association, who had the honor of welcoming France into the council, referred to the fact that nursing was first introduced into Canada by French women.

Five new countries were accepted into the council, and China was decided upon as the meeting place in 1929. Of the 1,849 delegates registered, 62 were from Canada.

Russian Refugees

Party From the Orient Will Settle in B.C. and Alberta

The steamship Empress of Asia docked at Vancouver recently from the Orient, bringing 112 Russians, followers of the late czar, and refugees from the Bolsheviks, who fled to Japan and China. As in the case of previous arrivals, the Russians will settle on farms in Alberta and Eastern British Columbia.

The party includes physicians, scientists, soldiers, teachers, farmers and skilled mechanics.

Rob it in for Lame Back—A brisk rubbing with Dr. Thomas' Electric Oil will relieve lame back. The pain will disappear about the oil and it will penetrate the tissues and bring speedy relief. Try it and be convinced. As the liniment sticks in the skin comes off and there are ample grounds for saying that it is an excellent article.

Something To Consider

Good Service Is Right That Public Will Demand

The interest of the consuming public is the last thing which either side considers; but the day will surely come when it will have to be one of the first, for, after all, the public holds the whip hand if it cares to assert itself. It is all a question of service. The continual disturbances in the coal industry are having the effect of greatly changing preconceived ideas of fuel economy. Strikes and lockouts are weapons for killing the goose which lays the golden eggs. Sooner or later employers and employees will be brought to understand this—Hamilton Spectator.

Worms sap up the strength and undermine the vitality of children. Struggle them by using Mather Graves' Worm Expeller to drive out the parasites.

Potato Crop Less

The U. S. department of agriculture estimates the combined potato crop of Canada and the United States at 125,000,000 bushels below that of last year. On the other hand potato production in Europe is estimated at 18,000,000 bushels more than that of 1924, and of Russia at 24,000,000 bushels more than for 1924.

Josephine (reading conclusion of long letter): "Then I will come home and marry the sweetest little girl on earth."

Juliet: "What a mean trick! After being engaged to you."

WRIGLEY'S

AFTER EVERY MEAL

THE FLAVOR LASTS

Probably one reason for the popularity of WRIGLEY'S is that it lasts so long and returns such great dividends for so small an outlay. It keeps teeth clean, breath sweet, appetite keen, digestion good.

Fresh and full-flavored always in its wax-wrapped package.

Spaniard Introduced Grape Fruit

Ponce de Leon, the Spaniard who discovered Florida while in search of the fountain of youth, is credited with having brought the little grape fruit to this country. For 300 years the fruit was not cultivated.

Many Mothers Recommend Them

Baby's Own Tablets Are Fine For Nervous, Sleepless Children

From Canada the fame of Baby's Own Tablets is spreading over the world. Mothers recommend them to other mothers and wherever they are tried nothing but words of praise are heard for these pleasant-tasting little tablets that promptly relieve the minor ailments of young children.

"Baby's Own Tablets are one of the best remedies for children's ailments I have ever used," says Mrs. Arthur T. Allen, of Auburn, Me. "My little girl was nervous and could not sleep. I tried the tablets and she was relieved at once. She was also troubled with constipation and nothing seemed to help her. I had used the tablets but a short time before her bowels were regular. All mothers should keep Baby's Own Tablets in the house for they are a valuable remedy."

Baby's Own Tablets are sold by all druggists or will be mailed on receipt of price, 25 cents per box, by The Dr. Williams' Medicine Co., Brockville, Ont. A little booklet, "Care of the Baby in Health and Sickness," will be sent free to any mother on request.

A fountain pen is more apt to leak when it is almost empty because the heat of the hand causes the air inside to expand, tending to force out the ink.

Minard's Liniment for Distemper

Birmingham, England, is one of the great industrial cities because each week there is made there 14,000,000 pens, ten tons of pipe, 6,000 metal beds, 7,000 tons of rifles and other articles.

PAINS IN LEFT SIDE AND BACK

Other Troubles Women Often Have Relieved by Lydia E. Pinkham's Vegetable Compound

Lachine, Quebec.—"I took Lydia E. Pinkham's Vegetable Compound because I suffered with pains in my left side and back, and with weakness and other troubles women so often have. I was this way about six months. I saw the Vegetable Compound advertised in the Montreal Standard and I had taken four bottles of it. I was a very sick woman and I feel so much better I would not be without it. I also use Lydia E. Pinkham's Sanative Wash. I recommend the medicines to my friends and I am willing for you to use my letter as a testimonial."—Mrs. M. W. ROSE, 580 Notre Dame Street, Lachine, Quebec.

Doctor Said an Operation

Provost, Alberta.—"Perhaps you will remember sending me one of your books a year ago. I was in a bad condition and would suffer with pains in my back and could not do anything. The doctor said I could not have children unless I went under an operation. I read testimonials of Lydia E. Pinkham's Vegetable Compound in the papers and a friend recommended me to take it. After taking three bottles I became much better and now have a bonny baby girl four months old. I do my housework and help a little with the chores. I recommend the Vegetable Compound to my friends and am willing for you to use this testimonial letter."—Mrs. A. A. ADAMS, Box M, Provost, Alberta. G

AGREE ON PLANS TO RETAIN NEW FREIGHT RATE

Edmonton.—If by any chance the board of railway commissioners, as a result of the application of the Montreal board of trade, to be heard September 29, agrees to rescind the order equalizing the rate on westbound export grain and flour, with that east-bound, immediate application will be made to the Canadian privy council for the hearing of an appeal against this decision. In order that the farmers of the west may not, without every possible effort to prevent it, lose the benefit of the equalized rate on this season's crop.

This decision was reached at a conference between Attorney-General Brownlee, of Alberta, S. B. Woods, K.C., Alberta's counsel in the freight rates case, and Attorney-General Cross, of Saskatchewan, held at Mr. Woods' office.

The attorney-generals for the two provinces agreed upon a line of action for submission when the application of the Montreal board of trade is heard by the railway commissioners on September 29, and since Attorney-General Cross of Saskatchewan will be unable, owing to other engagements, to represent his province at the hearing, Mr. Woods' services have been retained by both provinces, to oppose the application on their behalf.

Deport Christians From Mosul Territory

Turks Send Entire Population of Baljo Over Frontier

London.—The Turks have deported from two to three hundred Christians from the territory in the northern part of Mosul region. It is learned from authoritative sources. They encircled the village of Baljo and the monastery of Zerzawak, and sent the entire Christian population over the frontier. The Christians arrived absolutely destitute, having had nothing to eat for several hours and their plight was pitiful.

The Turks, it is stated, also intend to deport eight thousand Christians from the Goro region, and the Christian population there is in a panic.

The British do not regard the Turks' action as a military gesture, but as an illustration of what would happen to Christians if the Turk was to get possession of Mosul.

Prohibition For Weekend

Warsaw.—The Polish government has prohibited the sale of alcoholic beverages from 3 p.m. on Saturday until 10 a.m. Monday. An exception to the decree is beer with a maximum of two and one-half per cent. alcohol.

Enforcement of this prohibition has led to a series of mass demonstrations in several of the larger cities of Poland.

Prince May Spend Next Year

Ottawa.—A special dispatch from Montreal to The Citizen says word has been received in Montreal that the Prince of Wales probably will re-visit Canada and the United States next summer, passing a few weeks on his ranch at High River, Alta., and then visiting some of the American friends he made last year.

Borah Is Prompt

Washington.—Cofident with the departure from Paris of the French debt mission to the United States, Chairman Borah of the senate foreign relations committee, at a conference with President Coolidge, opposed terms for France more liberal than those given Britain.

Kept Going On Water Diet

New York.—Living for five weeks on water only and not missing a day's work during that period, Edmund Wunsch, a mill weaver, has just concluded a fast for his health. Although he lost 44 pounds, Wunsch says he "feels much better."

Will Deport Chinese

New York.—One hundred and thirty-four Chinese are in the Tohoku, awaiting deportation, because Chinatown could not settle its difficulties peacefully and resorted to the revolver and knife of long warfare.

W. N. U. 1926

British Foreign Office Blamed

Westminster Gazette Says Inquiry Into Case of Egyptian Prince

Should Be Made

London.—Prince Ahmed Sefidling, of Egypt, who recently escaped from an insane asylum at Hastings, now is resting in the home of a relative, on the Sea of Marmara, near Constantinople. This information is contained in messages received from the Prince's attendants by his friends in England.

"The excitement of the journey across the channel to France and thence to Trieste, where he took a boat for Constantinople, greatly fatigued the prince, who will rest a few days before being examined by leading Turkish alienists."

The Westminster Gazette declares that an inquiry is needed into the part played by the British government in holding the prince in an asylum in England for almost a quarter of a century, and alleges that friends who attempted to effect the release of Prince Ahmed during the last twenty years met with rebuffs from the British government and the lunacy commission, which refused to allow the prince to be examined by two independent specialists.

Certain eastern bankers, says the newspaper, have agreed to honor Prince Ahmed's checks, and if these are not met with funds now controlled by trustees appointed by the Turkish government, the matter will be presented to the League of Nations.

Canada Will Co-operate

Dominion Is In Full Sympathy With League of Nations

Geneva.—Senator Hoyt Bostock, of Canada, addressing the League of Nations assembly, explained the position of Canada in regard to the Geneva protocol on peace and disarmament.

He said Canada was unable to ratify the protocol, for although she favored the principle of arbitration and disarmament, her peculiar position made it impossible for the Dominion to do so.

Senator Bostock quoted a statement made by Premier King early this year on the subject, concluding that Canada had full sympathy with the league and would co-operate in all efforts of the league tending to promote the welfare of mankind. This statement aroused applause.

Discuss Anglo-American Relations

Judge Says World International Court Of Justice Needed

Vancouver.—An address on the subject of "Anglo-American relations," by Mr. Justice W. A. Macdonald, of Vancouver, was the feature of the banquet which marked the close of the annual convention of the Pacific Northwest Klans district here.

Appealing to reasoning powers rather than to sentiment, he made out a strong case for the establishment of a world international court of justice amicably to settle disputes between nations, and declared it was essential that the United States be a member.

Agreed On Debt Payments

Sofia, Bulgaria.—A useful step in the direction of the Balkan peace is apparent in the agreement between Bulgaria and Roumania regarding Bulgarian debt to the latter country. By the terms of the agreement Bulgaria will pay Roumania \$1,500,000 for Roumanian property seized during the world war and land belonging to Roumanian subjects expropriated by Bulgaria. The payment will be spread over four years.

Canada's Trade Increases

Ottawa.—Canadian trade increased during August nearly \$60,000,000, as compared with August, 1924. A summary issued by the department of customs shows that the grand total of exports and imports, including foreign merchandise exported, was \$194,358,288 last month, and in August, 1924, \$126,791,202.

Federal Tariff Commission

Montreal.—Joseph Usigat, a local boot and shoe manufacturer, announced that he had agreed to represent the province of Quebec on the federal tariff commission about to be established by the King government. The commission will sit at Ottawa, but just when Mr. Usigat could not say.

SAYS WHEAT POOL PROVES TO BE A BIG SUCCESS

Winnipeg.—The more hopeful outlook of agricultural conditions in Western Canada today was largely attributable to the "success of the wheat pool," by R. A. Hoey, former M.P. for Springfield, in addressing the Winnipeg Rotary Club here.

"The experiment so far has been an outstanding success," he declared. Last year, the pool had marketed 81,000,000 bushels of the total production of 345,000,000. The membership in the three prairie provinces was approximately 110,000, and total acreage involved over 17,000,000 acres.

Mr. Hoey is joining the publicity staff of the Manitoba pool, and is not seeking re-election for parliament.

British Dole System Restricts Emigration

Spirit of Adventure Being Killed Says Daily Mail

London.—The Daily Mail draws attention to the decrease in British migration which, it declares, is being strangled by dotes and pensions. The paper states that the greatest demand for emigration today is coming, not from the hundreds of thousands of young lads and young men who are content to be workless while drawing the dole, but from the older men with families who are not yet demoralized. In spite of the increasing unemployment in Britain, the total number of emigrants to the dominions this year is less than last year. For the months of April, May and June last, the returns show that 11,640 persons emigrated to the dominions against 12,449 for the same period last year.

Airmen Watching Turks

Troops On Frontier Waiting Decision In Mosul Dispute

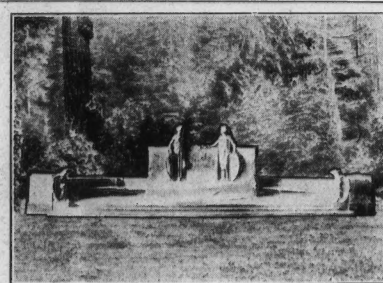

London.—Forty thousand Turkish troops, according to an observer just arrived from Iraq, are waiting behind the provisional Mosul frontier ready to advance if the League of Nations Council gives an adverse decision in its forthcoming settlement of the Mosul boundary dispute.

This information declared that British airmen are keeping a sharp watch on the Turkish forces.

Arctic Coming Back

Ottawa.—The Canadian expedition to the Arctic regions this year has been unable to reach its objective—Bachof Peninsula—and under command of Captain Bernier, the steamship Arctic is now returning. It is expected in Quebec about October 1.

The Harding Memorial Unveiled at Vancouver

Vancouver.—Bringing a message of goodwill, John H. Moss, of Milwaukee, president of the Kiwanis International, dedicated the Harding Memorial in Stanley Park in the presence of thousands of Vancouver citizens and large delegations from the United States. A feature of the address of Senator Frank B. Willis, of Ohio, representing the United States government, was the forecast that the United States senate would ratify the entrance of the United States into the world court.

Reciprocal greetings were voiced by Hon. Dr. J. H. King, Dominion minister of public works, and telegraphed messages expressing similar senti-

Manitoba Progressives Active

Will Put Candidate In Every Rural Riding

Winnipeg.—Progressive party candidates will be run in every rural riding in Manitoba, according to an official statement made following a meeting of the provincial executive of the party here.

In most of the constituencies, standard bearers have been lined up, and the official statement from the executive stated that Manitoba Progressives who have served in the house during the last term are all prepared to enter the field again, with the exception of Hon. T. A. Cresser and R. A. Hoey, retiring members for Marquette and Springfield respectively.

Robert Forke, Progressive leader, will make a tour of the province, speaking, where possible, at nominating conventions. Hon. T. A. Cresser will speak at Shovel Lake in connection with the nominating convention there September 23.

Refused Admission To U. S.

Communist Member of British House of Commons Is Not Wanted

Washington.—Shapurji Saklatvala, Communist member of the British House of Commons, has been refused admission to the United States to attend the Inter-Parliamentary Union here next month as a British delegate. Secretary Kellogg announced that instructions had been cabined to London to revoke the passport visa already granted Saklatvala. He explained that this action was taken under the immigration law because of inflammatory and revolutionary speeches made by Saklatvala in parliament and elsewhere, which have come to the attention of the state department only in the last few days.

"I do not believe," said Secretary Kellogg, "we should admit foreigners to this country to preach anarchy or a revolutionary overthrow of government."

Coarse Grain Pool

Saskatchewan to Operate Pool This Season

Regina.—Decision to operate the Saskatchewan coarse grain pools was reached at the meeting of the directors of the Saskatchewan wheat pool in the headquarters here.

The new pools cover oats, barley, flax and rye, and the initial payment on these grains will be: Oats, 2 C.W., 54 cents. Barley, 3 C.W., 50 cents. Rye, 2 C.W., 70 cents. Flax, 1 N.W., \$1.50.

In addition to the \$1,546 contracts now in the coarse grain pools, there are 499 coarse grain contracts "in abeyance" awaiting tracing or checking with their respective wheat contracts.

ALL PREVIOUS GRAIN LOADING RECORDS BROKEN

Winnipeg.—All Canadian grain records were broken on the western lines of the Canadian Pacific Railway during the first 15 days of this month. The amount of grain marketed and loaded during this period has already exceeded the unprecedented figure of the famous crop of 1915. And the previous grain record of the road, which was made in 1923, has now been exceeded by 9,256,630 bushels.

During the last 13 working days, 22,443 bushels of wheat, and 5,602,167 bushels of other grain have been marketed and loaded on western lines of the Canadian Pacific, making a total of 29,256,630 bushels.

No similar figures in the history of railroading have produced such colossal figures as these.

In the same period of this month, 12,488 cars of wheat, and 2,775 cars of other grains have been loaded making a total of 15,263 cars and 21,247,607 bushels of grain.

This grain has been loaded in eleven working days, at the rate of 1,387 cars per day, or slightly more than one car loaded per minute.

The nearest previous record for grain marketing was made in 1923, when the Canadian Pacific marketed twenty million bushels with 9,758 cars employed.

A Remarkable Expedition

Major Burwash Attempting One-Man Trip Along the Northwest Passage

Ottawa.—When Baron Byng's northward drive to the Arctic Ocean ended on August 1 at Aklatik, the northern outpost of civilization, another remarkable expedition began, and, unless misfortune intervenes, it will be terminated about 12 months from now.

Major J. T. Burwash, F.R.G.S., who accompanied his excellency the governor-general to the Arctic coast, almost immediately afterwards commenced the first one-man trip along the so-called Northwest Passage from west to east.

From what is known by officials of the department of the interior here, Major Burwash is now at Coronation Gulf, about one quarter of the distance around the north and the east coast of the Dominion. The trip from Aklatik to Coronation Gulf was done by boat. From the Gulf for the remainder of the long, bleak journey, Major Burwash will travel by foot. Those who have travelled with him in the northland entertain not the slightest doubt that he will weather the long tramp.

Millionaire Sportsman Are Fined

Windsor, B.C.—For violating the provincial game regulations, Cornelius W. Whitney, son of Harry Payne Whitney, of New York, and Harry P. Davidson, of Locust Valley, Long Island, were fined \$10,000 each. They recently fined \$100 and costs with an option of thirty days in jail before a magistrate here.

Premier Bruce Flays Communists

Melbourne, Australia.—A vigorous attack was made against Communists by Premier Bruce in an address during which he declared they had gained control in recent years of trades unions and were using it to foment social revolution and the establishment of a dictatorship by them over the whole nation.

Premier King Coming

St. Peter's, N.S.—Speaking here, Premier Mackenzie King intimated that he would speak in Manitoba, Saskatchewan and Alberta following his present tour of the Maritime Provinces. He did not say whether the western tour would be extended to British Columbia.

Aircraft Probe To Be Public

Windsor, N.S.—Speaking here, Premier Mackenzie King intimated that he would speak in Manitoba, Saskatchewan and Alberta following his present tour of the Maritime Provinces. He did not say whether the western tour would be extended to British Columbia.

Test Speeder Plane

Mitchellfield, I.I.—An aeroplane which can attain a speed of 300 miles an hour is being tested here, it is said. The world's record is 278 miles an hour.

With Better Business Conditions Some Movement Again Manifest To Utilize Western Resources

(By John Sweeting, Industrial Agent, C.P.R.)

A continuation of improved business conditions is shown throughout the western provinces with very distinct prospects in the growing volume of, purchases as the fall and winter trading proceeds. With the good average crop, the employment of surplus labor and approximately the same third quarter construction programme, the situation should be maintained, and, as a matter of fact, should produce a more stable condition on which to calculate winter business. There is every foundation for suggesting that the coming winter's trade will be better than the average over the last few years.

There is some movement again being manifest to utilize western resources, two or three of the asphalt deposits of B.C. are being developed and a new plaster plant under construction at the coast. A plant is to be erected in Southern Saskatchewan to manufacture brick, tile and potteryware, and investigations being carried on in Alberta to utilize straw waste in the manufacture of various straw board products in addition to proposals in Manitoba to produce paper from a similar raw material. The growing of hemp for its fibre and marketing as such is being carried out in Manitoba, together with some experimental fields of fibre flax with a view to encourage its growth in the lake districts north of Winnipeg.

Processes are being investigated, looking to the briquetting of the lignite coals of Saskatchewan, and the pulpwood areas of Manitoba are being requisitioned to take care of the pulp and paper plant which is to be erected on the Winnipeg River. The salt deposits in the McMurray district are under commercial development, while the bituminous sands of Northern Alberta are continuously being tested and processed with a view to ascertain proper method of treatment. Altogether there has been a pronounced activity throughout the western provinces in development and experimental work in many lines, looking to a period which appears to be within reasonable distance, when work on a commercial scale can be profitably accomplished.

The agricultural situation in a general way is better. The position, possibilities, prospects and importance of this industry is being more fully realized, and methods adapted to its more economic development are being utilized with compensating results. The incoming of new settlers into the settled districts, together with improvements that are being steadily carried out on many existing farms, as well as the variety of products now available for market, is, and has created, an improvement in the western field, which is helping to a very large extent to bring back sanguine anticipations of success in putting the agriculturist foremost in a field which is the determining factor to the well-being of the prairie.

It is not difficult, therefore, to realize that the improvement in conditions which is and has taken place is due largely to the confidence that is being shown, and which is bringing about increases in trading, opening up of resources, construction of power plants and new factories, and tending to interest outside capital to further investigate western investments. The more difficult period, which necessitated heavy retrenchments, appears to have been overcome, opening up for present and future consideration a programme of expansion which should develop without undue hindrance.

Crude Oil Production
A decrease of \$4,818 in value is shown for last year's production of crude petroleum in Canada as compared with the previous 12 months. The output for last year, according to revised statistics, amounted to 140,773 barrels, valued at \$467,400, while in the preceding 12 months the production totalled 170,169 barrels worth \$522,018.

Stassfurt, Germany, has a potash mine where men work 2,600 feet underground at a temperature of 104 degrees Fahrenheit.

W. N. U. 1595

University Gets Burbank Garden

Plant Wizard Offers It For Half Its Value

The gardens, in which Luther Burbank, world-famed plant scientist, for fifty years has conducted his experiments, near Santa Rosa, California, are to pass into the hands of university scientists for maintenance and perpetuation.

Indications are that Stanford University will get the gardens since Burbank favors that institution and offers to place his treasured gardens in its keeping at half their valuation, the sum to be determined by a friendly committee.

Stanford has had open competition from a half-score of eastern and mid-western universities as well as two British ones, but the latter have been outbid by the commercial capitalists seeking to commercialize the achievements of the plant wizard.

Burbank himself was reticent concerning the identity of the institutions, but from W. Lambert Hill, personal friend of the scientist and one of the chief sponsors of the endowment plan, it was learned that one of these was "probably Harvard." Hill said private capital had offered as high as a quarter of a million dollars for Burbank's gardens. This and other offers were refused by Burbank, he said, because the scientist did not wish to "commercialize" his fifty years of work.

Two other offers of \$100,000 and \$150,000 were made by private financiers, Burbank admitted.

Burbank does not intend to retire for he is in the best of health, but will devote his time to his office duties and advising scientists who would take over his work.

Honey Industry

Very Rapid Growth Shown In Western Provinces During Recent Years

The honey industry has experienced a very rapid growth in the western provinces during the past few years. In 1920 the value of output only amounted to about \$85,000, while the production for the past year is estimated to be worth close on \$400,000. Manitoba records for 1924, 1,800 beekeepers with 27,113 colonies and a production of 1,302,000 lbs., with a value of \$195,200. The unseasonable climatic conditions in the province during the past year had a very adverse effect on the industry, as this province produced over \$400,000 worth of honey during 1923 and 1924. Last year Saskatchewan had an output of 77,000 lbs. of honey, worth \$15,053, representing the output of 2,900 colonies. This is a record output for the province, the previous record having been made in 1923, when 21,657 lbs. of honey, valued at \$5,475, were produced. The number of beekeepers in Alberta is estimated at 160, while the production of honey last year amounted to 55,000 lbs., of the value of \$15,000. British Columbia reports a production last year from 14,601 colonies of 570,239 lbs. of honey, valued at \$149,412. This is the second greatest production ever recorded by the province.

To Curb Forest Fires

British Columbia to Extend System of Fire Lookout Stations

The British Columbia forest service is planning to extend its series of fire lookout stations so that eventually every important timber area in the province will have an observatory. Five lookout stations are already established and the department is now planning a station for Mount Benson, which will serve a wide area near Nanaimo and southeast for Phoenix Mountain near Granby.

Alberta Oil Wells
The No. 4 Rorville well (imperial), continues to amaze geologists. Its asphalt production increased July to 546,125 gallons, 73 degrees Beaume, an increase of 25 barrels daily over the June production. The production continues to increase and the flow of gas at 20,000,000 cubic feet a day is being marketed. This flow will shortly be harnessed to supply Calgary.

Too often a fellow's charity seems to be glued to his fingers.

Saskatchewan Poultry Pool

Organization Will Not Operate Until Objective Is Reached

The objective of one-third of the exportable surplus of poultry and poultry products was not secured by the Saskatchewan Egg and Poultry Pool up to September 1, and therefore the executive have decided not to operate the pool at present.

It was decided to immediately launch an intensive campaign in 163 rural municipalities where the sign-up was greatest. Contract signers will be given two weeks from September 17 to withdraw, but it is pointed out that unless the required quota is secured the pool will not operate.

Five field organizers will be sent out almost immediately on organization work and these men and women will appoint an organizer in each of the 163 municipalities. Hitherto the work of organization has been conducted on a voluntary basis, but the municipality organizers will now be paid on a commission basis.

To take care of overhead expenses it was decided to raise the objective in the 163 municipalities to 45 per cent of the exportable surplus. As soon as this has been secured the pool will establish three collecting points and start to operate.

Improve Vancouver Grain Port

Increasing Capacity of Elevators and Vessel Loading Facilities

Many changes and improvements have been effected in the capacity and equipment of the grain elevators and vessel loading facilities of the port of Vancouver during the past season, in anticipation of handling a record volume of Western Canadian grain during the coming winter season. A recent survey shows that the port now has seven grain elevators, with a total capacity of 6,900,000 bushels. Grain loading berths number thirteen.

Nothing jars a man like being compelled to love by contract.

The Economic Benefits Which Canada Will Reap From Completion Of H. B. Road

Russia Endeavors To Protect Wild Life

Has Established Animal Sanctuaries and Wild Life Is Restricted

Hunting is still of considerable economic importance over large parts of Siberia, particularly in the tundra and the forest regions. In some localities it is the chief means of livelihood, while in others it supplements fishing and farming. Sparse population favors the survival of fur-bearing animals, but the supply is decreasing as the country becomes more thickly settled. In consequence of the increase in the number of hunters and the more intensive methods of hunting, fur-bearing animals are killed faster than they multiply.

This destruction has led the Russian Government to restrict the hunting of wild animals and birds. Animal sanctuaries have been established. It is difficult, however, to enforce hunting laws over such a vast territory inhabited by so primitive a people.

Canadian Horses Shipped Abroad

Endeavoring to Open Up New Market For Canadian Horse Breeders

A policy, designed to open up new markets for Canadian horse breeders, has been inaugurated by the Canadian department of agriculture, which has collected 50 head of horses and will ship them to Europe, where there is a good market, according to present reports. All charges will be paid by the department; records will be kept and when the horses have been sold it will be known exactly what profit, if any, was made. It is years since there has been any export trade in horses.

Unique Feat by Round the World Goller

Here is the golf ball that was played around the world by I. O. Upham, who looks quite unconnected as he poses with his famous ball in his hand. Mr. Upham is a member of the San Francisco Golf Club and of the Los Angeles Company, also of San Francisco. Wonder who will be the next to chance his ball around the world? 'Twas a bet of \$50 that started Mr. Upham teeing-off in foreign countries, playing one hole on every course with the same ball. At Teianan a disaster nearly overtook him. His ball rolled into a ditch, but after twelve men had looked for it, it was found two hundred feet away from the place where it had disappeared. The day was declared, Mr. Upham

played on the Hermitage Park and Golf course in Copenhagen, where the chief hazards were deer which had to be shooed off the putting greens. Next day he went back for another game and found the entire park occupied by the Danish mobilized army, 10,000 strong. At Braid Hills, outside of Edinburgh, he was able to play until 10 o'clock in the evening without losing his ball. Before returning to San Francisco, Mr. Upham had played 60 courses. Now he is looking forward to meeting in China the Round the World Golf Club, which leaves New York, December 3rd, on the Empress of Scotland, its members hoping to be able to follow internationally the example set by Mr. Upham.

The completion of the Hudson Bay Railway will mean lower grain rates, a large immigration who will arrive in the west by the bay route, development of the vast mineral and power resources of the north country, and greatly enhanced land values in Western Canada, according to Clarence F. Graham, a director of the On-To-The-Bay Association and an advocate of the Hudson Bay route for forty years. In an interview with the Saskatoon Star, Mr. Graham said:

"The economic benefits which Canada will reap from the completion of the Hudson Bay Railway and the opening of the short route to Liverpool were outlined in an interview by Clarence F. Graham, a director of the On-To-The-Bay Association here, who has fought for the northern route since the early eighties and who is probably personally responsible for interesting more influential persons in the project than any other living man."

"The announcement that the Hudson Bay Railway will be completed," said Mr. Graham, "will be secondary in importance only to that of Sir John Macdonald in 1896, that a syndicate of capitalists was prepared to undertake the construction of the Canadian Pacific Railway and had signed a contract to that effect, implying the linking up of British Columbia with Eastern Canada, and thus fulfilling the most outstanding of the conditions under which British Columbia entered Confederation."

Mr. Graham expressed the firm conviction that ultimately the Hudson Bay route will be navigated the full twelve months of the year.

"What are the prospective results from the opening of the route?" Mr. Graham was asked. "These appear to be some of the benefits to be covered in an interview," was the reply, "but some may be mentioned. Transportation rates on all exported grain will be materially lowered. The export cattle industry will be placed on a permanently profitable basis, not only because the total mileage, to say, Liverpool, will be lessened, but in addition the proportionate rail haul will be greatly reduced. As is commonly known, the rail haul is what 'shrink' the cattle. On the other hand, the sea trip via Hudson Bay will be cool and live cattle should undoubtedly arrive at the Old Country market in splendid condition, with correspondingly greater realizations. The fishery will be opened up, and fresh salt water fish will be an ordinary article of diet in prairie homes."

"It must not be forgotten that there are vast waterways available tributary to the Hudson Bay Railway. With the rapid development of the country it is unbelievable that this will not be utilized, and distributed over a vast area by high tension lines, as is now being done in Ontario."

"The mineral wealth tributary to the Hudson Bay Railway will become widely known following the opening of the route."

"While immigration to Canada from Great Britain and Europe will undoubtedly be stimulated, fully as important will be the surge of prosperous people from the United States. The large American land owning companies, armed with the slogan, 'Hudson Bay Route Being Opened' will resume the activities which were stopped by the war, will be able to kindle the enthusiasm of Americans, and an influx of experienced desirable farmers from the United States will result."

"An immediate consequence will be enhanced farm land values, and their consequent greater value as security for financial purposes. Within a maximum of five years from the opening of the bay route, it will seem incredible that good farm lands were available at the prices of 1925."

"Inevitably the west, with its rapid increase of population, will have the balance of political power."

"Just as the Canadian development which followed the construction of the Canadian Pacific Railway surpassed the expectations of its most zealous advocates, so will that following the opening of the Hudson Bay route exceed all present forecasts."

"These are some of the things we may with confidence expect from the opening of the northern outlet," said Mr. Graham in conclusion. "It will transform Western Canada."

Fewer Labor Troubles

Time Loss In Industrial Disputes Less In August

The time loss caused by industrial disputes was less in August than in the previous month, or in August last year, says the federal department of labor Gazette. Seventeen disputes were in progress at some time during the month, involving 12,002 employees and resulting in a time loss of 102,316 working days. Corresponding figures for July were as follows: 16 disputes involving 12,382 work people and 320,433 working days; and for August, 1921, sixteen disputes, 9,172 employees and 206,118 working days.

NATURE'S WARNINGS

Danger Signals That Everyone Should Take Seriously

Pain is one of Nature's warnings that something is wrong with the body. Indigestion, for instance, is characterized by pains in the stomach, and often about the heart; rheumatism by sharp pains in the limbs and joints; headaches are a sign that the nerves or stomach are out of order. In some ailments, however, the pain is not so prominent. In this case Nature's warning takes the form of pallor, breathlessness after exertion, palpitation of the heart, and loss of appetite. Whatever form these warnings take, wise people will not ignore the fact that many diseases have their origin in poor blood, and that when the blood is enriched the trouble disappears. Dr. Williams' Pink Pills are most helpful in such cases because they purify and build up the blood to its normal strength. In this way it tones up the nerves, restores the appetite and gives perfect health. Miss Hazel Bernitt, of Amherst, Ont., has proved the great value of this medicine and says: "I am a young girl and have been working in a factory for the past four years. For two years I had been in such poor health that at times I could not work. I was thin and pale, and troubled with headaches and fainting spells. I doctored nearly all this time, but it did not help me. My mother advised me to take Dr. Williams' Pink Pills, and after using them for a while I could notice an improvement in my condition. I used nine boxes and can truthfully say that my health is restored. When I began taking the pills I weighed 97 pounds and now I weigh 114. I feel that I owe my good health to Dr. Williams' Pink Pills and hope other ailing people will give them a fair trial."

You can get these pills through any medicine dealer or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

For COLIC AND CRAMPS PAINS IN THE STOMACH There's Nothing Equals

It has been in use for over 80 years; its action is pleasant, rapid, reliable and effectual, and relief comes promptly.

Received Message From King and Queen

Aunt of Earl Jellicoe Recently Celebrated Her 104th Birthday

Earl Jellicoe's aunt—Miss Catherine Jane Jellicoe—celebrated her one hundred and fourth birthday at her home in Southampton, England. She received congratulatory messages from all parts of the British empire, a telegram from the King and Queen of England being among the first to arrive. The British naval hero visited his aunt, who continues to live an active life. She breakfasted in bed as usual and spent the morning reading a mass of messages. Later two little girls from a neighboring orphanage, of which Miss Jellicoe is a generous benefactor, brought her flowers, and with them Miss Jellicoe discussed her own girlhood with great zest.

2 Years' Backache Subdued by "Nerviline"

"Backache was the bane of my life, and for two years I was so lame as to be unfit for work," writes E. S. Sloane, from Georgetown. "While in Smith Bros.' Drug Store, I heard of Nerviline being a wonderful pain-destroyer, so I decided to try Nerviline. Thanks to Nerviline, my two years' backache was rubbed away, and to-day I am perfectly well."

All those who suffer from weak, aching backs, those whose muscles are stiff, whose joints are swollen, let us try Nerviline—the liniment that never fails. 50c at all dealers.

Paris puts a frill on its smartest overblouses, and so we have it here as the distinguishing touch on the two models pictured above. While crepe-de-chine develops this blouse, the front of which is gathered to the back slightly below the shoulder-line in yoke effect. Right up to the minute is the convertible collar with its trimming-band of the new pansy purple shade. The same trimming is used for the pocket tabs, and the narrow cuffs on the long sleeves. Printed silk in a small design fashions the blouse with the short sleeves, with material of a lighter tone used for trimmings. Sizes 34, 36, 38, 40 and 42 inches bust. Size 38 bust requires 3 1/2 yards of 36-inch material. Price 20 cents.

Home sewing brings nice clothes within the reach of all, and to follow the mode is delightful when it can be done so easily and economically, by following the styles pictured in our new Fashion Book. A chart accompanying each pattern shows the material as it appears when cut out. Every detail is explained so that the inexperienced sewer can make without difficulty an attractive dress. Price of the book 10 cents the copy.

SUNDAY SCHOOL LESSON

OCTOBER 4
PAUL IN ATHENS
Golden Text: In him we live, and move, and have our being. Acts 17:28.
Lesson: Acts 17:16-34.
Devotional Reading: Psalm 139:1-12.

The Text Explained and Illuminated
Paul's Occupation At Athens, verses 16, 17.—While Paul awaited the coming of Silas and Timothy (see The Historical Background), his spirit was provoked within him as he beheld the city full of idols. To the cultured Athenians these idols were only objects of art, but to the ignorant they were gods.

A good criterion of a man's character may be gained from the knowledge of the things which stir his heart.

Paul preached in the synagogue to the Jews and proselytes, and also reasoned in the marketplace every day with them that met him. In this he was like So-and-so, who was wont to stop his compatriots and by cross-examination try to arouse in them a desire for better things.

Paul may have been more successful in his work with individuals than in his public preaching. Personal work often wins where preaching fails. This is a ministry which all can exercise.

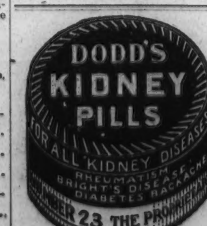

What Is Evaporated Milk?

Interesting Information Regarding This Important Article of Diet

While the use of evaporated milk is general all over Canada, occasionally the query is made, "What is Evaporated Milk?" Evaporated Milk is nothing but fresh milk from which part of the water has been removed by evaporation. (Fresh milk is 87 per cent. water.) Nothing is added to it. Nothing but water is taken from it. This concentration makes it more than twice as rich as ordinary milk. After it is thus concentrated it is put in air-tight containers, sterilized and marketed by the grocer, the manufacturer putting his brand on it, as Borden's St. Charles Milk, for example. Milk is fresh unless it has been subjected to attack by the bacteria which destroy its freshness. (Milk, when it comes from the cow, is exposed to the air and therefore subject to bacterial contamination.) In the course of time the numbers of such bacteria increase and their action on the milk destroys its freshness. When milk becomes sour it is because the lactic acid bacteria have attacked the milk in such numbers and for such time as to develop the lactic acid that makes it sour. Evaporated Milk is concentrated at plants in the country within a few hours after it comes from the cow, the Borden Company, for instance, operating large condensaries at such dairy centres as Truro, N.S., Ingersoll and Norwich, Ontario, and South Sumas, B.C. The milk is put into air-tight containers and sterilized. By sterilization all bacteria are destroyed. The attack of such bacteria is absolutely stopped. No further bacteria can get into it. The sealed container brings it to the consumer as fresh and sweet as when it came to the country plants. It will keep fresh and sweet on the pantry shelf until the can is opened and, put in a cool place, will then keep sweet much longer after opening than bottled milk after it is delivered to the home.

Chinese was their clearest hint instead of shaking hands."

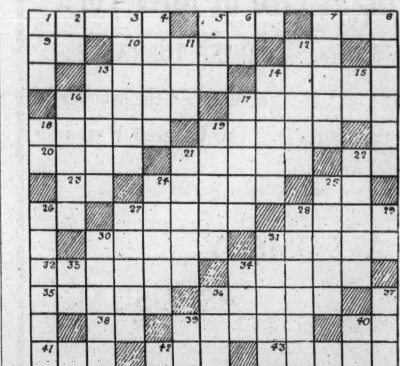

Chinese was their clearest hint instead of shaking hands."

The Editorial Senators

The appointments of Mr. J. Leth, Toronto, and Mr. W. A. Buchanan, Lethbridge, Alta., to the senate are well merited honors to two eminent journalists. They will be a strength to the Upper Chamber and will ally support the reforms that are so much needed to make that body serviceable and powerful in Canada's interests. In journalistic circles their selection will be approved and commended.—Kingston Whig.

Speed in the Air

It is very evident that those who desire real speed must take to the air. A mere 80 or 90 miles an hour in an automobile is pretty tame compared with the record of the French flyer who made better than 150 miles an hour for four hours.

A Corrector of Pulmonary Troubles.—Many testimonials could be presented showing the great efficacy of Dr. Thomas' Electric Oil in correcting disorders of the respiratory process, but the best testimonial is experience and the Oil is recommended to all who suffer from these disorders with the certainty that they will find relief. It will ally inflammation in the bronchial tubes.

B.C. Wealthy Applies
Shipments of British Columbia Wealthy applied made to South Africa last season arrived in good order, according to reports received at Vancouver, and the deal was so satisfactory that repeat orders have been received for 1925 delivery.

Many have been relieved of corsets by Holloway's Corset Remover. It has power of its own that will be found effective.

Winter with its snow and ice, as we have had a touch of, will soon be with us. How is your outside radio equipment? Will it stand the weather and still give you the results you desire? Our C.G.E. Antenna sets are just what you need. The include everything necessary to build an efficient Antenna, including a lightning arrester. Ask for particulars at Radio Shop.

Close Work

Bill had succeeded in getting a job in a motor factory. He did not even know himself how he got it, for he knew nothing at all about engineering.

On the second day at work he chanced to meet a friend of his who was equally ignorant.

"Hello, Joe!" he said. "How's business."

"Oh, all right!" was the reply, "How are you getting along with your new job?"

"Great!" said Bill. "But it's terribly close work. Why, do you know, we have to work to the thousandth of an inch."

"Heavens, Bill! How many thousandths are there in an inch?"

"Millions, Joe—millions."
